# How do you make your sweepstake money collecting better with Beem It? Easy:

**ONE** Cut out each rectangle containing the QR code into cards and shuffle them (or put them in a hat and shake them around).

**TWO** Each person picks a card with a QR code at random and scans it with their phone camera. This will take you to a pre-filled payment screen (Note: if you have not entered a Beem It username but generated a print out, your QR code will only automatically pre-fill the sweepstake amount)

**THREE** Each person simply swipes to pay and enter the sweep - May the best horse win!
